

## Post Circumcision Instructions

- The baby can take a warm bath right after the circumcision using baby shampoo
- Diapers can be used after the circumcision
- Blood spots might be visible on the diapers and this is normal
- You can use regular powder for skin excoriations
- The plastibell will be separated after 7 days of the circumcision
- Edema and redness of skin will appear sometimes, this will disappear after separation of the plastibell
- Yellowish spot may appear under the penis surface sometimes, this will disappear spontaneously after one week
- Use (MEBO) cream on the penis 3 times a day for 10 days
- In case the plastibell does not separate after one week of the circumcision, please bring the baby to the hospital to have it removed
