

Urology & Andrology Department

مستشفى طيبة
TAIBA HOSPITAL

1808088 
www.taibahospital.com

Using the latest non-invasive techniques, Taiba Hospital's Urology & Andrology Department is equipped to help patients from all age groups in treating an array of health problems, including:

- Kidney, ureter & bladder stones
- Early detection of prostate cancer & treatment of benign prostate hyperplasia
- Urinary tract infections for pediatric & adult patients
- Chronic urinary tract infections
- Chronic epididymitis & prostatitis
- Sexually-transmitted diseases (STDs)
- Urinary incontinence for pediatrics & adults
- Sexual dysfunction problems for male patients
- Infertility for male patients

The department is also able to perform surgeries & minimally-invasive endoscopic surgeries for cases of urinary tract infections & infertility, such as:

- Endoscopic laser fragmentation & extraction of kidneys, ureters & bladder stones
- Minimally invasive laser & bipolar vaporization of the prostate
- Treatment of varicocele with the most advanced methods
- Penile implants for ED patients
